Browse the Web using the Globalstar SatFi 2

Chuck Reisinger - 2020-01-09 - in Globalstar SatFi 2

Follow the instructions below to browse the web on your Globalstar Sat-Fi 2:

- 1) While connected to the SatFi 2 satellite hotspot, select **Web** from the welcome screen.

- 2) On the next screen select **SatBrowse**

3) You can now enter a web address in the search bar. You will see search results displayed, tap on the orange search result to view the optimized web page.

NOTE: Selecting [Standard Version] will download a non-optimized web page, resulting in large data consumption and possible overage costs
